About This Game

While the bloody battle between Gandohar's troops and the armies of the Orcs is raging in front of the gates of Oswaroth, the emperor waits in the depths of his palace on the outcome of the struggle for power. However, he does not know that an elite troop of Orcs, led by Rogdor, is making its way through secret paths into the fortress and is now close to the portals of the throne room...

Gameplay

Utilize the opportunity to slip into the role of the Emperor Gandohar and his henchman Sordahon! These villains from the "Two Worlds" universe are now playable for the first time ever in this strategy game, thus opening an entirely new perspective into the vast world of Antaloor. Using foresight and skill, you must defend abandoned ruins, dark forests and winding catacombs against the onrushing Orcs. Ward off each attack with clever tactics and weaponry, defending Gandohar's throne in the Oswaroth fortress! Are you ready to break the high score and confront the ultimate Castle Defense challenge against opponents from around the world?

It was a nice try, you had a good run of it, but not worth a single cent to anyone.

Take this one out behind the barn and put her out of her misery.. Just got it and i love it!. Game is fun but 0 replay
Once you learn what and when to buy/upgrade units you will keep buying/upgrading same units everytime you restart the level..
The gameplay is too simple. There's only 7 different units. Two of those are functional copies of another two. And one is a commander you can't place. All units have basically the same two upgrade options. Each level has a small number of fixed positions you can place your units. Also, it's short, only 6 levels and 5 arena levels. I finished it all in under 3 hours on easy. But due to the simplicity I was still bored. Fast forward wasn't fast enough. And I don't like how fast forward resets to normal speed after each wave. The graphics look nice, nothing fantastic but good.

It's simple, it's short.. Tower defense game where you can spend points to change the position of your units and provide healing in addition to the normal upgrades. Some units are cheaper to revive than heal if you sank enough gold into them. Not worth the cost on its own, but it's part of the two worlds bundle. Quite possibly not even worth it then due to the hundreds of tower defense games online.. Terrible, got this in a bundle. Just don't bother

. It's not bad if you have some spare time you want to kill, I had a 90% off coupon for it so I paid \$1.

Not worth \$10 though.. I had a 90% coupon, so I'm not angry, just disappointed.

You don't need much thinking.

Your towers(soldiers) are moving, so you have to teleport them from time to time to keep the troop together.

Yawn!. Much better than the RPG on which it is based.. this is sadly the best game out of the two worlds series. its actually fun and fights can be challenging at times without getting out of hand or unfair. if you like tower defense games or are just looking for a small game to kill some time, i would recommend this

While I enjoy the deep strategic elements of Two Worlds II Castle Defense, it's oppressively difficult and a chore to finish the levels. Maybe if all the stages were unlocked right off the bat it wouldn't be such an issue, but when you have to finish a level to move onto the next it becomes a frustrating, repetitive affair.

. It's short and rather easy but I enjoyed playing it!

However, I don't recommend paying for it unless you buy the "Two Worlds Collection", then it's an alright little game.. The game was cheap.

The game is cheap.

Nothing more to know about.. **PROS:**

+ adds a bit to the Two Worlds II story

CONS:

- terrible graphics

- poor sound

- imbalanced levels

- gets boring\tedious fast

Comment:

I got this game as part of the Epic Edition. Now it is part of the Two Worlds 2 Complete bundle (also sold separately too, of course). I like tower defense games, played my share of them on Steam and in free flash games. Because of this I can say that this tower defense is truly terrible. Why? Well, it looks terrible, sounds are bad and the level design is poor. The only nice thing about it is that it sort of shows a short prequel story to the Two Worlds II game. It consists of 5 levels and an arena. Here is what it is about -1st lvl: defend the castle from orcs, 2nd lvl: defeat orcs in their camp, 3rd lvl: fight desert guardians, 4th lvl: fight more desert guardians and find first throne, 5th lvl: fight undead and find the second throne ... the two thrones are used for the energy transfer and this is where Two Worlds II starts. Gameplay is standard but there are difficulty spikes, for example when you you destroy EVERYTHING with fire mages and then in the last wave the boss comes in and wrecks you. If you got it already then try it, if you want to, but there is no real reason to buy this in the bundle or separately. There are better (FREE!) flash tower defense games out there...

If you liked this review you can find more on the [Curator page](#) or in my [Review Corner](#).. I really enjoyed this game i got for 90%. Along with the whole Two Wolrds collection for under \$10. I DO NOT recommend buying at full price as the game lacks proper content and detail. It's pretty much a slap together tower defence that give you something to do while downloading another game. If yu get the coupon then get it but It's not worth it to pay full price.. It's short and rather easy but I enjoyed playing it!

However, I don't recommend paying for it unless you buy the "Two Worlds Collection", then it's an alright little game.
