Tried to play with a PS4 pad since it is shown on the controls screen but it would not pick up the pad either by directly opening the game or through steam big picture. Played a little on my keyboard and it was incredibly boring and the camera was awful.. It truly was metal as PHUUK!

masterpiece - It's worth every penny and second.

STEAM AWARD'S BEST PUBLISHER FOR MEE!. I agree with others that this is not necessarily a desktop game. but I don't care. I like the game. I have it on Android and on PC. Its fun on both.

Earn money by destroying things. Try to get to the next destination. If you don't go back to current garage and upgrade.

I do wish there was more to do once the game is beat though. The challenges don't feel like enough. This game REALLY needs a level editor and a community system for the levels.. Beglitched is an amazing game.

It is a match-3/minesweeper hybrid, and as weird as that sounds, it is executed FLAWLESSLY.

The graphics are charming, the soundtrack is lovely, and while the game is overall a tad short, it is a wonderful time.. Fun game really Recommend people to get game... C: awesome sound track BUT i think they need to update for diffrent songs if possible... the songs keep you going C:... it gets your brain power to really work and feel like giving up BUT once done you feel so good C:... um i played 2, 60 puzzles i dont know if i could do 100 pieces XD it will kill me.. love rouches... and man what a game XD if bored just take the time to play this game oh wow it hits the spot... please do an update soon !! feel like their could be like some kind of different gameplay like survival or you know little arcade games. Complete the puzzle before time runs out but of course it would like a 20 puzzle piece game instead of 60 :OV. and what about having avaters to get when completing puzzles or unlockables but of course that would mean you would need more puzzles... C>:. i cry its so funny game if u alone dont buy it
it need funny stupid friends

It's kind of disappointing because the game is kind of slow unlike the previous expansion.. There's no gore in here.. pretty decent little game. To be competitive you need to dump massive amounts of money into this game and it also requires you spend multiple hours per day to stay competitive as well. It is a major time sync that is completely made for those that started when the servers opened not really friendly for new users.. I really enjoyed this game!

The puzzles, the jumpscars, the story, its amazing all!
But i dont like the checkpoint / save system, i hope they will change that.

This is my walkthrough of this game! Check it out before buying :)
<https://www.youtube.com/watch?v=5YcOrRPDVGy>. I love the Ancient Egyptian culture and this game is one of the best city builders i've played with the civilisation.

Yes its rather old, the graphics are best viewed at a distance and you do need to be patient as it is quite slow paced (pyramids can take all day to build). there is a lot to learn to get to grips with it.. Contrary to the Steam Store info, the game does not appear to support gamepads while in VR mode.
